Journal of Non-Newtonian Fluid Mechanics, 52 (1994) 423–424
Elsevier Science B.V.

Contents of Vol. 52

Vol. 52, No. 1

Birefringence and laser-Doppler velocimetry (LDV) studies of viscoelastic flow through a planar contraction
L.M. Quinzani, R.C. Armstrong and R.A. Brown (Cambridge, MA, USA) 1

Application of low-order Discontinuous Galerkin methods to the analysis of viscoelastic flows
F.P.T. Baaijens (Eindhoven, The Netherlands) 37

A novel apparatus for rheological measurements of electro-magneto-rheological fluids
K. Minagawa, T. Watanabe, M. Munakata and K. Koyama (Yonezawa, Japan) 59

Numerical simulation in converging channel flow of the fluid M1 using an integral constitutive equation
H.J. Park (Kyungki-do, South Korea), D. Kim and K.-J. Lee (Seoul, South Korea) and E. Mitsoulis (Ottawa, Ontario, Canada) 69

Short Communication
How to integrate the upper convected Maxwell (UCM) stresses near a singularity (and maybe elsewhere, too)
M. Ranardy (Blacksburg, VA, USA) 91

Book review 97

Corrigenda 99

Calendar 101

Vol. 52, No. 2

Special Issue: Proceedings of a meeting on The Rheometry of Polymers, from the Solution to the Melt, Abbaye Royale de Fontevraud, France, May 12–15th, 1993

Preface v

The anomalous shear flow properties of S1
N.E. Hudson and J. Ferguson (Glasgow, UK) 105

The shear and extensional flow properties of S1
J. Ferguson and N.E. Hudson (Glasgow, UK) 121

The rheometry of solutions of polyisobutylene in a mixed solvent
D.M. Binding, J. Maia and K. Walters (Aberystwyth, UK) 137

Extensional rheometry of fluid S1
Y.W. Ooi and T. Sridhar (Melbourne, Australia) 153

Shear and elongational flow properties of fluid S1 from rotational, capillary, and opposed jet rheometry
N. Willenbacher and R. Hingmann (Ludwigshafen/Rhein, Germany) 163

Complex viscosity predictions for the S1 fluid using harmonic analysis on applied non-sinusoidal stress waveforms
J.M. Davies and T.E.R. Jones (Plymouth, UK) 177

Stretching flow tests on liquid S1 and similar liquids
D.R. Oliver (Birmingham, UK) 183

A novel X-ray rheometer for in-situ studies of polymer melts and solutions during shear flow
P. Keates, G.R. Mitchell (Reading, UK), E. Peuvrel-Disdier, J.B. Riti and P. Navard (Sophia Antipolis, France) 197

A new torsional rod instrument for high frequency dynamic viscoelastic measurements
T. Nakken, G.H. Nyland, K.D. Knudsen, A. Mikkelsen and A. Elgsaeter (Trondheim, Norway) 217

Dynamic measurements of surface tension of solutions of polyisobutylene in mixtures of polybutene oil and Decalin
F.Y. Lewandowski and D. Dupuis (Mulhouse, France) 233

Effect of surface properties on polymer melt slip and extrusion defects
N. El Kissi, (Grenoble, France), L. Léger (Paris, France), J.M. Piau and A. Mezghani (Grenoble, France) 249

Flow characteristics of viscoelastic fluids in an abrupt contraction by using numerical modeling
P. Saramito and J.M. Piau (Grenoble, France) 263

Calendar 289

Vol. 52, No. 3

A note on selection of spaces in computation of viscoelastic flow using the *hp*-finite element method
K.K. Talwar, H.K. Ganpule and B. Khomami (St. Louis, MO, USA) 293

Symbolic evaluation of the Ericksen–Leslie equations in the computational domain
M. Güler (Ankara, Turkey) 309

Visualization of the flow of low density polyethylene/polystyrene blends through a planar step contraction
B. Tremblay (Boucherville, Que., Canada) 323

Numerical simulation of non-Newtonian free shear flows at high Reynolds numbers
J. Azaiez and G. M. Homsy (Stanford, CA, USA) 333

Relation between some rheological properties of polyisobutylene solutions and their mode of preparation
K. Khalil, A. Tougui and D. Sigli (Tours, France) 375

Rheological characterization of the time and strain dependence for polyisobutylene solutions
R.F. Liang and M.R. Mackley (Cambridge, UK) 387
